

To the FCC;

I am very concerned over your plans to expand your LPFM radio stations that would in effect take priority over current FM stations translator service. I am referring to national and regional stations like "KLOVE". I very strongly support stations like "KLOVE" because of its positive effect (Christian music) as an alternate to the garbage that is broadcast on most any other station. If this station were taken off the air, you would be taking away a source of encouragement and hope for many people in our community. I believe "KLOVE" offers a service with far more "moral value" than most other stations on the air today. This therefore provides the many families in our community with a far better alternative than listening to music and programs that mislead our youth.

sincerely;
Garth Dettwyler
